Enterprise Business Management Software

Hospitality Management Suite

Healthcare Facility Management Software

eCOMMERCE Platform

- **Have a tough time in handling their business data.**
- Use multiple applications to run their businesses.
- **Not able to harvest data from leads, proposals, projects & service calls.**
- Cannot track information on their assets, tools, vehicles, buildings, etc.
- **Unable to monitor their staff's working hours, tasks, reports & feedback.**
- Efficient ways to distribute & reallocate tasks among available resources.
- **Need an easy way to visualize & manage their data.**
- Want to securely access their data through internet.
- **Need to track statutory & TAX filings.**

What is this Business Process Management Software?

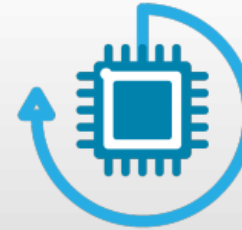

1

Capture your business data from every user & store it efficiently for processing.

2

Process the data, visualize, analyse, prioritize, account, and audit the information.

3

Visualize the information, manage tasks, frame policies & boost business performance.

4

Generate comprehensive reports and notifications.

5

Where ever you are, this HTML5 application helps you to make the right decisions.

6

Prakriya is a multi user, multi location, multi platform, cloud enabled software.

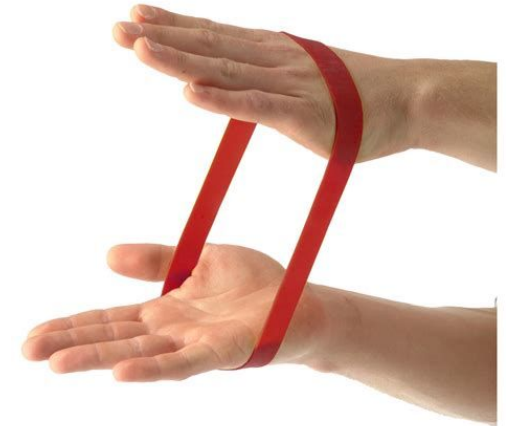

- It is a simple, multi user business management tool.
- Gives you a bird's eye view of your business processes.
- Lets you monitor your staffs, their time sheets & leaves.
- Track Leads, Proposals, Projects, Service calls & Tasks.
- Keeps track of your assets - vehicles, tools & its records.
- Maintains a document store for your business.
- Helps you to navigate your business with confidence.
- Allows you to monitor your staffs working off site.

Why should one choose DEUCN BPMS?

- **It is light weight & scalable.**
- It is based on HTML5 technology, Ruby on Rails and Mysql.
- **It follows the classic Client Server Architecture design.**
- It is generous in terms of the concurrent users it can handle.
- **Granularity in terms of user permissions is extensive in this software.**
- With the right module, it can even activate an industrial bell on schedule.
- **Accountability is our prime concern, our software logs each & every step.**
- It is flexible enough to be stand alone, on a LAN, or in the cloud.
- **Automated Backup keeps your data safe.**

How does DEUCN's BPMS look like?
